

A Monday hours line that still says closed is not today's opening

A closed line is not an opening.

A visitor can open your page on Monday and still see Sunday's closed line

They will not guess today's opening.

3/9

Put today's first real opening on the public hours line

One line. On the page they already have.

Name who updates that line before you open

A closed line is not a person.

If the line still says closed, say when you actually open

Do not leave Sunday's word on Monday.

Test the page yourself in a private window

Read what they read.

Do not add a second page to hold Monday

Fix the hours line you already show.
